

Kite Surfing

Flying a kite is for kids !!! but have you tried flying a power kite, its a totally different experience. Power kites use hydrofoil wings and can capture the wind very effectively. The efficiency of these kite provide the power that can be harnessed to drag the 'kiter' along the ground.

The experienced 'kiter' can use the power and lift provided by the kite to jump and do tricks. Beginners can do 'scudding' by allowing themselves to be pulled along a beach - like water skiing, or by using a trolley. The trolley is like a skate board.

Kite surfing is popular with wind surfers on water as it provides the power to pull the surfer through the waves.

A number of providers have introductory day activity packages if you want to have a tryout first before diving head long into a new sport.

Things you need to learn

- How to fly and control a kite
- How to rig a kite
- All about protective equipment and safety
- How to jump and scud on sand
- How to collapse a kit.
